Inventory of Sites with Known or Suspected Environmental Concerns

Area or Site Description	Coordinates		Sites and Potential Impacts	History of Site Use	Potentially Responsible Party	Land Ownership	FUDS Number (if applicable)	ADEC Hazard Index Number (if applicable)	Cleanup complete per ADEC?	Estimated Area of Impact	Safety Concerns				Environmental Concerns				
	Latitude	Longitude									Fuel (F)	Structures (S)	Junk (J)	Dumps (D)	PCS	Dioxins	PCBs	Organics	Metals

Notes:
 C = contamination or hazard confirmed
 S = contamination or hazard suspected
 X = contaminant or hazard no longer considered an issue
 (R) = contamination or hazard has been removed
 Fuel - Includes former and current fuel storage tanks and piping

Sites and Potential Impacts:
 Structures - Includes features such as buildings, foundations, poles, utilities
 Junk - scattered debris
 Dumps - garbage and debris piles
 PCS - petroleum-contaminated soil
 Dioxins - Detected or suspected dioxin contamination

Abbreviations:
 ADOT&PF - Alaska Department of Transportation and Public Facilities
 ADEC - Alaska Department of Environmental Conservation
 DoD - Department of Defense
 HI - Hazard Index
 NFA - No Further Action

Safety Concerns:
 PCBs - polychlorinated biphenyl (PCB) detected in equipment and contaminated soil
 Organics - Includes soil contaminated with volatile and semivolatile organic compounds, pesticides, and herbicides
 Metals - Includes soil contaminated with heavy metals such as lead, arsenic, and chromium
 WWII - World War II
 *Although cleanup is listed as complete on the ADEC database, additional work still needs to be performed.
 Note that ADEC cleanups are focused on contaminated media but do not typically address physical hazards and debris.
